Managed GitHub Actions Runners

Save 10x

```
 9      jobs:
10        build:
11          name: build and release
-           runs-on: ubuntu-latest
12  +         runs-on: ubicloud-standard-2
13          steps:
14            - name: Check out code
15              uses: actions/checkout@v4
```

ubicloud

Easy to migrate

- Change a one-line in your workflow file

- Full compatibility with GitHub Actions

  - Continue using GitHub Actions as usual

  - Check your jobs, your logs on the GitHub UI as previous

  - Same pre-installed software as the default GitHub runners

```
 9    jobs:
10      build:
11         name: build and release
 -         runs-on: ubuntu-latest
12  +       runs-on: ubicloud-standard-2
13         steps:
14           - name: Check out code
15             uses: actions/checkout@v4
```
